

OXYGEN HEAD SPACE ANALYZER MACHINE

Mass Oxygen Tester

Your test requirements

Oxygen Check Sensor

Integration

100% Package testing in your factory

Key Features :

- **Real-Time Monitoring:** This analyser provides continuous or real-time oxygen level readings without requiring the sample to be opened.
- **Non-Invasive Measurement :** They typically use sensors like polarographic, galvanic, or optical sensors, which are capable of measuring oxygen without altering the sample.
- **Automatic Data Logging :** The device can record oxygen levels over time & can be integrated with 21CFR Part11 Compliance.

- **High Sensitivity :** These devices are designed to detect low levels of oxygen, ensuring that packaging conditions are optimal to preserve the product's integrity.
- **Rejection System :** Rejection System is useful for reject vial (Not matched with Acceptance Criteria) with the help of rejection cylinder.

Sensor Features :

- Infeed Vial Low
- Rejected Vial in Good Track
- Outfeed jam

Specification :

Model No :	DHSO-300
Output Bottle / Hour :	300 BPM in 2ml Vial
Suitable for Filling Volume :	2 ml to 100 ml
Power Supply :	230 ± 10V , Single Phase
Air Supply :	6 Bar
Machine Dimension :	1600mm(L) x 600mm(W) x 1850mm(H)

Suitable for
