

Details of Main Parts :

- Specially Design High Speed and Accurate Label Applicator will be use for Labelling Operation
- High Speed Servo Motor (750 Watt) will be fix to distance label accurately.
- Label Roll Holding Disc (Dia. 300mm) to Hold Label Roll
- Empty paper winding unit to wind empty paper of label roll during labelling operation
- Micro Adjustment Setting will be done by hand wheel to Set Different Label as per Bottle height
- Web Support Roller for Support of Web of label roll around the Label Applicator

Specification :

Model :	DLM-120-W
Output Speed :	30 BPM in 100 ml
Suitable for :	5100 ml to 1000 ml
Power Supply :	230 $\pm$ 10V , Single Phase
Air Supply :	6 Bar
Machine Dimension :	1800mm(L) x 1000mm(W) x 1500mm (H)

Optional Accessories :

- Safety Cabinet.
- No Label Detection & Rejection System.
- Wrap Round Assembly for Larger Container for Rotate Bottlein Labelling Location.
- Thermal transfer, laser, or inkjet printer.
- Rejection of Vial/ Bottle with printing defects
- SCADA software to process data acquisition in accordance with FDA 21CFR Part 11.

Suitable for
