

AUTOMATIC PFS FILLING & STOPPERING MACHINE

MassPFS Series

Single-use Syringes Have Become A Pharmaceutical Application Format That Provides Safety, Hygiene, And Dosing Accuracy For Medical Injections.

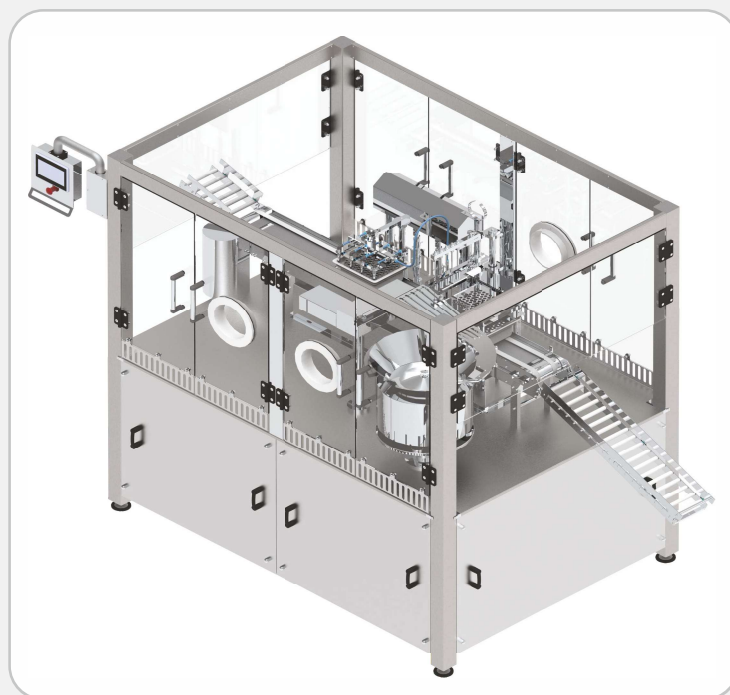

The PFS Filling & Rubber Stoppering Machines In The Durva MassPFS Series Integrate The Most Advanced Technology For PFS Filling & Rubber Stoppering For Aseptic Processing.

Machine Equipment Have Been Designed To Operate In Clean Rooms, Complying With cGMP And USFDA Standards, In Special Compliance With The Requirements Of The Pharmaceutical Industry.

Filling Range of MassPFS Series is 6000 PFS/ Hour in 2 ml

Specification :

Model :	DPFS - 60	Number of Stoppering Station :	5 Head
Output Speed :	100 PFS / Minute	Suitable for PFS Size :	0.5 ml to 10 ml PFS
Number of Filling Station :	5 Syringes	Dimensions :	3000mm(L) x 1500(W) x 2000 (H)

Suitable for

SEMI-AUTOMATIC PFS FILLING & STOPPERING MACHINE

MassPFS Series

Suitable for

The Semi-Automatic PFS Filling & Rubber Stoppering machines in the Durva MassPFS series integrate the most advanced technology for PFS Filling & Rubber Stoppering for Aseptic Processing.

Machine equipment have been designed to operate in clean rooms, complying with cGMP and US FDA standards, in special compliance with the requirements of the pharma industry.

Filling Range of MassPFS Series is 1200 PFS/ Hour in 2 ml

Specification :

Model :	DSPFS - 60
Output Speed :	20 PFS / Minute
Number of Filling Station :	1/2/5 Syringes
Suitable for PFS Size :	0.5 ml to 10 ml PFS
Dimensions :	2000mm(L) x 1400(W) x 2000 (H)
